One set of materials. Two prices.

Tbilisi. One set of psychological materials.

BLACK-AND-WHITE PRINTING

7 lari

COLOUR PRINTING

42 lari

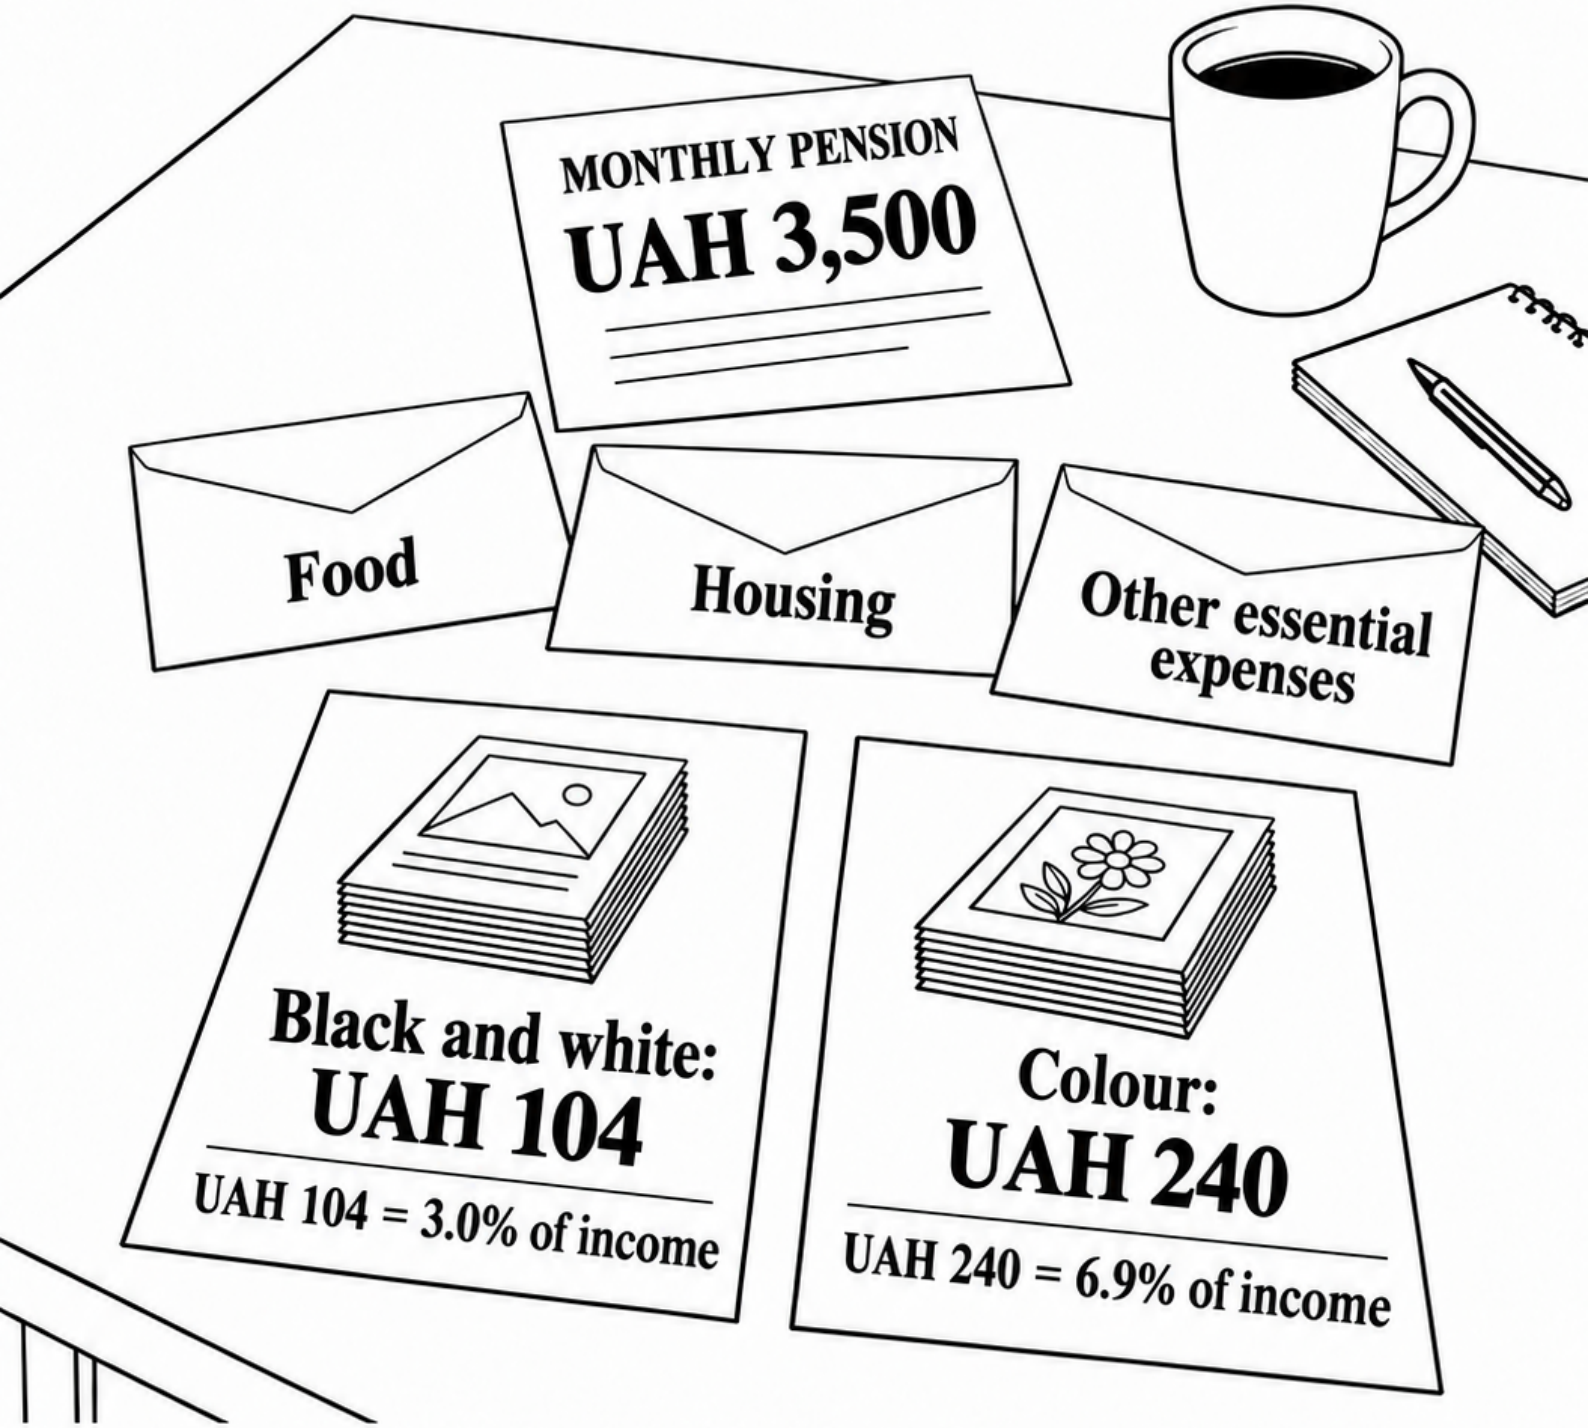

6 times more expensive

One set: 12 double-sided A4 sheets and 4 single-sided sheets. 28 printed sides in total.

Calculated from PHOTO MAIKO's published prices, Tbilisi, October 2026.
The actual duplex-order cost may differ. This is not an average price for Georgia.

How much is really left?

Monthly income: UAH 3,500

But how much of the money left over is that?

Income is not the same as money available after essential expenses.

Hypothetical pension of UAH 3,500. Printing costs based on Jera's published rates, Kyiv, October 2026. Not an estimate of all Ukrainian pensioners' expenses.

Free to download.
But what about printing?

A free download does not mean free printing.

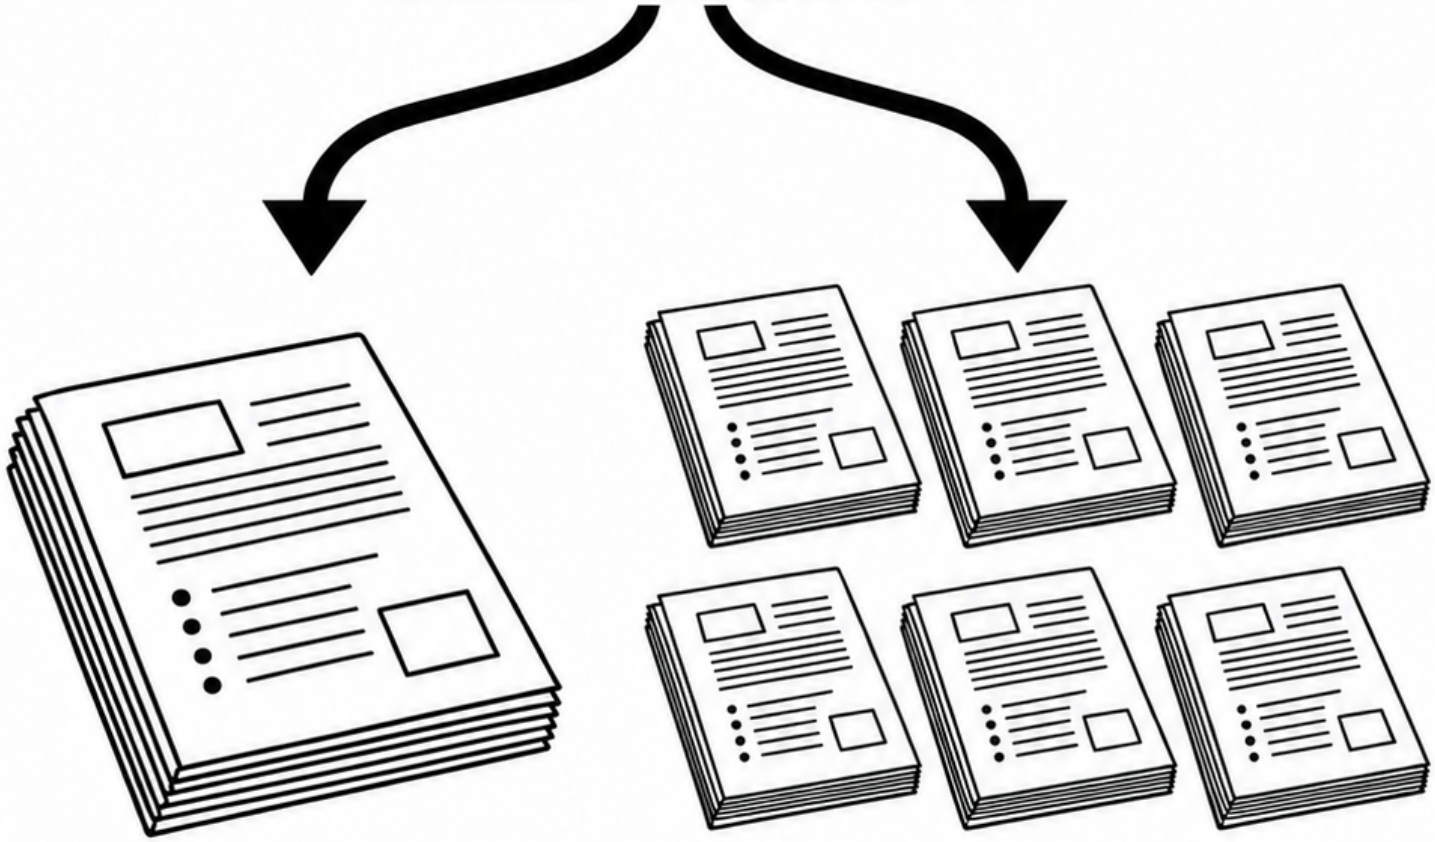

Access to information does not always mean access to a printed copy.

A home printer, print shop or free distribution by an organisation are different ways to obtain a paper copy.

How can paper materials reach people who need them but cannot access them?

Same budget. Different number of sets.

42 lari

1 colour set

6 black-and-white sets

The same amount. Six times as many copies.

One sample set: 16 A4 sheets and 28 printed sides.

Calculated from PHOTO MAIKO's published rates, Tbilisi, October 2026, assuming the price per printed side stays the same. The actual order price may differ.
